Baseline Accessibility Audit

Compliance Sheriff
By Cyxtera

Baseline Accessibility Audit Features

Automated Accessibility Testing

Reviews core templates and user flows to audit and expanded range of content.

Manual Accessibility Testing

Using a combination of assistive technologies and devices, the Compliance Sheriff team will test compliance and usability across operating systems and responsive design.

Documented Reports

An Accessibility Audit Report summarizes found issues and includes remediation recommendations. A Bug Report highlights every error on every page and a consultative audit review briefing ensures that reported items make sense and can be acted upon.

Industry Expertise

All work is performed by industry experts using assistive technologies and devices following best practices to support end user needs.

Schedule a review call with the Compliance Sheriff team so that we can share how an accessibility audit will benefit your organization.

Office of Civil Rights (OCR) complaints and ADA Title III requirements are driving organizations of all sizes and throughout departments – legal, web, C-suite – to make web accessibility a priority.

In 2017, plaintiffs filed at least 814 federal lawsuits about allegedly inaccessible websites according to Seyfath Shaw LLP. And that trend is set to continue in 2018.

The wait and see approach is no longer working for private or public organizations. Litigation of OCR complaints or drive by lawsuits is surging and your organization could be next.

Where to Start: Baseline Accessibility Audit

It's time to make accessibility a priority. Knowing where to start and gaining expertise to solve your web accessibility requirements can be overwhelming. The Compliance Sheriff team provides a Baseline Accessibility Audit for organizations.

The Baseline Accessibility Audit is a manual assessment of the primary drivers of your website's user experience. The Audit evaluates the most representative pages of your site to ensure the look, feel and presentation of information is accessible. It also assesses the primary processes visitors undertake when they do business or access services at your site. This process ensures each user scenario is accessible.

Easily Achieve Accessibility Compliance and Usability Best Practices

The Compliance Sheriff team will undertake a Baseline Accessibility Audit using the leading web accessibility software that delivers organizations visibility into their web applications or digital content exposure. The Baseline Accessibility Audit provides an actionable report and recommendations on remediation so that the teams responsible can address common issues first.

Manual testing is performed by experts using assistive technologies ensures proper techniques are used and true issues are properly reported.
